| CFDA Number: | 93.894 -- Resource and Manpower Development in the Environmental Health Sciences |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Private institutions of higher education

Others (see text field entitled "Additional Information on Eligibility" for clarification)

Public and State controlled institutions of higher education

Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education

Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education

Additional Information on Eligibility:

Only domestic, non-profit, private or public institutions may apply for grants to support National Research Service Award (NRSA) short-term research training programs. Foreign institutions are not eligible for NRSA institutional training grant programs. The applicant institution must have a high quality research program in the area(s) proposed for the research training and must have the staff and facilities to conduct the proposed research training. The research training program director at the applicant institution must be responsible for the selection and appointment of trainees to receive NRSA support and for the overall direction of the training program.

Description

The National Institutes of Health (NIH) will award Ruth L. Kirschstein National Research Service Award (NRSA) Short-Term Institutional Research Training Grants (T35) to eligible institutions to develop or enhance research training opportunities for individuals interested in careers in biomedical and behavioral research. Many of the NIH Institutes and Centers use this grant mechanism exclusively to support intensive, short-term research training experiences for students in health professional schools during the summer. In addition, the Short-Term Institutional Research Training Grant may be used to support other types of predoctoral and postdoctoral training in focused, often emerging, scientific areas relevant to the mission of the funding NIH institute or center. - The proposed training must be in either basic, behavioral, or clinical research aspects of the health-related sciences. This program is intended to encourage students to pursue research careers by exposure to and short-term involvement in the health-related sciences. The training should be of sufficient depth to enable the trainees, upon completion of the program, to have a thorough exposure to the principles underlying the conduct of research.- The number of applications funded will vary and depend upon the number of meritorious applications determined by the official review process. Although NRSA short-term institutional training grants are an NIH-wide grant mechanism, not all NIH institutes and centers support short-term training. Therefore, all applicants are strongly encouraged to contact the institute's representative (listed below in Section VII) before preparing an application. Such contact will help ensure that the applicant will obtain information about the NIH institute's interest and supplemental instructions concerning NRSA short-term institutional training grants.- Awards for T35 institutional training grants may be for project periods up to five years in duration. Trainees selected for short-term training are required to pursue research training for 2-3 months on a full-time basis, devoting at least 40 hours per week to the program. More information may be found in Section III, 3. - Only domestic, non-profit, private or public institutions which have a high- quality research program in the area proposed, as well as sufficient staff and facilities

may apply for this research training program.- Eligible Program Directors are basic and clinical researchers with skills, knowledge, successful past training records, and available resources to conduct the proposed research training program. - Only one application per application receipt date is appropriate.- Application forms (PHS 398) and NRSA instructions are available at: <http://grants.nih.gov/grants/funding/phs398/phs398.html> in an interactive format. For further assistance contact Grants Info, Telephone (301) 435-0714, Email: GrantsInfo@nih.gov- Telecommunications for the hearing impaired: TTY (301) 451-0088

National Institutes of Health
Novel Tools for Investigating Brain-derived GPCRs in Mental Health Research (STTR [R41/R42]) Modification 1

| | |
|--|--|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | PA-06-374 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Jan 07, 2010 Multiple Receipt Dates - See Link to Full Announcement for details. |
| CFDA Number: | 93.242 -- Mental Health Research Grants |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others

Small businesses

Foreign institutions are not eligible to apply. In STTR Phase I and Phase II, at least 40% of the work must be performed by the small business concern and at least 30% of the work must be performed by the single, partnering research institution. The basis for determining the percentage of work to be performed by each of the cooperative parties will be the total of direct and F and A/indirect costs attributable to each party, unless otherwise described and justified in Item 12, Consortium/Contractual Arrangements, of the PHS398 Research Plan component of the SF424 (R and R) application forms. The NIH will accept as many "different" applications as the applicant organization chooses. However, the NIH will not accept similar grant applications with essentially the same research focus from the same applicant organization. This includes derivative or multiple applications that propose to develop a single product, process or service

that, with non-substantive modifications, can be applied to a variety of purposes. Applicants may not simultaneously submit identical/essentially identical applications under both this funding opportunity and any other HHS FOA, including the current parent SBIR or STTR FOAs.

Description

This funding opportunity announcement (FOA) solicits Small Business Technology Transfer (STTR) grant applications from small business concerns (SBCs) that propose to develop technologies and approaches (i.e., novel ways to use new or existing technologies) that will enable researchers to study the structure and/or function of brain localized G-protein coupled receptor proteins (GPCRs) and/or potentially identify novel selective and specific agonists/antagonists to these receptor subtypes, with a focus on mental health function or dysfunction. Technologies and approaches aimed at known receptor subtypes or orphan receptors would be of potential interest to NIMH. Budgets up to \$250,000 total costs per year and time periods up to 2 years for Phase I may be requested. Budgets up to \$450,000 total costs per year and up to 3 years may be requested for Phase II. -No funds have been specifically set aside for this program; the number of awards and the amount of funds provided for awards have not been predetermined. -This FOA will utilize the STTR (R41/R42) grant mechanisms for Phase I, Phase II, and Fast-Track applications and runs in parallel with a FOA of identical scientific scope, PA-06-375 that solicits applications under the Small Business Innovation Research (SBIR) (R43/R44) grant mechanisms. -Eligible organizations: Only United States SBCs are eligible to submit STTR applications. A SBC is one that, on the date of award for both Phase I and Phase II funding agreements, meets ALL of the criteria as described in Section III. -Eligible individuals: Any individual with the skills, knowledge, and resources necessary to carry out the proposed research is invited to work with his/her organization to develop an application for support. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support. On an STTR application, the Project Director/Principal Investigator (PD/PI) may be employed with the SBC or the participating non-profit research institution as long as he/she has a formal appointment with or commitment to the applicant SBC, which is characterized by an official relationship between the small business concern and that individual. -Applicant SBCs may submit more than one application, provided each application is scientifically distinct.

Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Native American tribal organizations (other than Federally recognized tribal governments)
Public and State controlled institutions of higher education
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions

of higher education

Additional Information on Eligibility:

Foreign institutions are not eligible to apply. Eligible agencies of the Federal Government can apply. Faith-based or community-based organizations can apply. Applicants may submit more than one application, provided each application is scientifically distinct.

Description

This Funding Opportunity Announcement (FOA) issued by the National Institute on Alcohol Abuse and Alcoholism (NIAAA), National Institutes of Health, solicits Exploratory/Developmental Research Grant (R21) applications from institutions/organizations that propose to investigate the effectiveness of structural interventions that reduce the risk of HIV/AIDS transmission by changing the environment of alcohol use. Although a variety of structural and environmental interventions have been employed successfully to reduce other drinking-related problems, there has been little research that extends such efforts into the realm of HIV/AIDS risk reduction.

Others - Faith-based or community-based organizations can apply.

Description

Purpose. This Funding Opportunity Announcement (FOA) issued by the National Institute on Drug Abuse (NIDA) and the National Institute of Mental Health (NIMH), National Institutes of Health (NIH), encourages drug abuse research that elucidates the contribution of non-injection drug abuse to the acquisition and/or transmission and/or disease progression of HIV/AIDS. Specifically, it seeks to: 1) investigate how, where, why, and among whom HIV/AIDS is spreading through non-injection drug use associated high-risk sexual behavior; 2) develop effective prevention and treatment interventions for non-injection drug users at risk for or infected with HIV; and 3) improve accessibility and utilization of evidence-based, integrated care for non-injection drug abuse, risky sexual behavior, and HIV/AIDS and other infectious diseases. **-Mechanism of Support.** This FOA will utilize the NIH Research Project Grant (R01) award mechanism. **-Funds Available and Anticipated Number of Awards.** Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications. Although both the NIDA and the NIMH are participating in this FOA, only the NIDA has set aside funds specifically for this program. The estimated amount of funds available for support of 3-7 projects awarded as a result of this FOA is \$3,000,000 for fiscal year 2007. Future year amounts will depend on annual appropriations.

Description

Purpose. This Funding Opportunity Announcement (FOA), issued by the National Institute of Child Health and Human Development (NICHD) and the National Institute of Mental Health (NIMH), solicits Research Project Grant (R01) applications from institutions/organizations that propose improved modalities for the diagnosis of tuberculosis (TB) infection and disease, including MDR and XDR TB, in children with HIV/TB co-infection. Applications are also invited for the evaluation of the pharmacokinetics of first- and second-line anti-tubercular medications, as well as pharmacokinetic drug interactions between these and antiretroviral medications in children with HIV/TB co-infection. Finally, applications are solicited for research to evaluate the effect of HIV/TB co-

infection in children on the central nervous system. This FOA is intended to stimulate research to improve the diagnosis and treatment of HIV-infected children with tuberculosis (TB) co-infection, and to form a basis for future research and clinical care. -Mechanism of Support. This FOA will utilize the NIH Research Project Grant (R01) award mechanism. -Funds Available and Anticipated Number of Awards. The NICHD intends to commit \$1.4 million, and NIMH intends to commit \$500,000 in FY 2008 to support three to six meritorious applications. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

Modification 1

| | |
|--|--|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | HRSA-08-036 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Dec 07, 2007 |
| Expected Number of Awards: | 9 |
| Estimated Total Program Funding: | \$1,335,000 |
| CFDA Number: | 93.110 -- Maternal and Child Health Federal Consolidated Programs |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Only public and private not for profit academic institutions of higher learning may apply.

Description

The purpose of this grant is to enhance behavioral, psychosocial, and developmental aspects of pediatric care. This is to be accomplished through: 1) support for fellows in developmental-behavioral pediatrics preparing for leadership roles as teachers, investigators, and clinicians advancing the field of developmental/behavioral pediatrics; and 2) providing pediatric practitioners, residents, and medical students with essential biopsychosocial knowledge and clinical expertise.

Faculty Development: Integrated Technology into Nursing Education & Practice Initiative
- Modification 1

| | |
|--|--|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | HRSA-08-022 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Dec 10, 2007 |
| Funding Instrument Type: | Cooperative Agreement |
| Expected Number of Awards: | 2 |
| Estimated Total Program Funding: | \$600,000 |
| CFDA Number: | 93.359 -- Nurse Education, Practice and Retention Grants |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others - Eligible applicants are collegiate schools of nursing capable of carrying out the initiative's purposes. Eligible applicants must provide evidence that they have the capacity and infrastructure in place to carry out the program goals and objectives. Eligible applicants must provide a formal written agreement (See Program Definitions) demonstrating a collaboration with one or more academic health centers, schools of nursing, accredited public or private institutions of higher learning, or other public or private entities capable of carrying out the program goals and objectives. Eligible applicants are collegiate schools of nursing capable of carrying out the initiative's purposes. Eligible applicants must provide evidence that they have the capacity and infrastructure in place to carry out the program goals and objectives. Eligible applicants must provide a formal written agreement (See Program Definitions) demonstrating a collaboration with one or more academic health centers, schools of nursing, accredited public or private institutions of higher learning, or other public or private entities capable of carrying out the program goals and objectives.

Description

The purpose of this initiative is to provide support to nursing collaboratives for faculty development in the use of information and other technologies in order to expand the capacity of collegiate schools of nursing to educate students for 21st century health care practice. Nursing collaboratives will use healthcare information systems to enhance nursing education and practice, optimize patient safety, and drive improvements in health care quality. For this initiative, use of

information and other technologies in nursing education and practice, includes, but is not limited to, informatics, telehealth, mannequin-based and patient simulators, computer-based instructions, virtual simulation, interactive simulated case studies, advanced 3D graphics, e-Learning technology, and other simulated or virtual methods to enhance nursing education and practice.

| CFDA Number: | 93.110 -- Maternal and Child Health Federal Consolidated Programs |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others - Only public and private not for profit academic institutions of higher learning may apply.

Description

The purpose of this program is to provide graduate training of nurses for leadership roles in maternal and child health, including women's health and the care of pregnant women, infants, children, and adolescents in community public health programs. This is to be accomplished by advancing the knowledge and skills of nursing health professionals and enhancing their effectiveness in community public health programs providing maternal and child health services, academia and or clinical settings.

| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others - Eligible applicants are schools of nursing, nursing centers, academic health centers, State or local governments, Indian Tribes or Tribal organizations, other public or private non-profit entities including faith-based and community organizations, and for-profit organizations capable of carrying out the legislative purpose. For Purpose E1, which focuses on expanding enrollment in baccalaureate nursing programs, the only eligible applicant organizations are accredited 4-year collegiate schools of nursing. Schools of nursing must be accredited by the National League for Nursing Accrediting Commission, Inc. (NLNAC) or the Commission on Collegiate Nursing Education (CCNE) to be eligible applicants. Eligible applicants are schools of nursing, nursing centers, academic health centers, State or local governments, Indian Tribes or Tribal organizations, other public or private non-profit entities including faith-based and community organizations, and for-profit organizations capable of carrying out the legislative purpose. For Purpose E1, which focuses on expanding enrollment in baccalaureate nursing programs, the only eligible applicant organizations are accredited 4-year collegiate schools of nursing. Schools of nursing must be accredited by the National League for Nursing Accrediting Commission, Inc. (NLNAC) or the Commission on Collegiate Nursing Education (CCNE) to be eligible applicants.

Description

Grants are awarded to eligible institutions for projects to strengthen and enhance the capacity for nurse education, practice and retention to address the nursing shortage. Applicants must select and focus on one of the nine purposes in the

grant application. The Education priority area includes Purpose E1) expanding enrollment in baccalaureate nursing programs; Purpose E2) developing and implementing internship and residency programs to encourage mentoring and the development of specialties; and, Purpose E3) providing education in new technologies, including distance learning methodologies. The Practice priority area includes Purpose P1) establishing or expanding nursing practice arrangements in non-institutional settings to demonstrate methods to improve access to primary health care in medically underserved communities; Purpose P2) providing care for underserved populations and other high-risk groups; Purpose P3) providing managed care, quality improvement, and other skills needed to practice in existing and emerging organized health care systems; and, Purpose P4) developing cultural competencies among nurses. The Retention priority area includes Purpose R1) career ladder bridge programs which promote career advancement for registered nurses and nursing personnel; and, Purpose R2) enhancing patient care delivery systems through improving the retention of registered nurses and enhancing patient care.

Eligible Applicants

Others for allopathic and osteopathic medicine, dentistry, veterinary medicine, optometry, allied health, public health, podiatry, pharmacy, nursing, and graduate programs in behavioral and mental health. Schools of allopathic and osteopathic medicine, dentistry, veterinary medicine, optometry, allied health, public health, podiatry, pharmacy, nursing, and graduate programs in behavioral and mental health.

Description

Minority Faculty Fellowship Program grants increase the number of under represented minority individuals who are members of the faculty in a health profession school. The grants enable schools to provide a stipend and a training allowance to the faculty fellow. Grantees must: (1) Identify, recruit and select individuals who are underrepresented racial minorities in the health professions for teaching, administration, or research positions at a health professions institution; (2) Provide such individuals with the skills necessary for tenured faculty positions, which may include training in pedagogy, program administration, design and conduct of research, grant writing, and the preparation of articles suitable for publication in peer review journals; (3) Assist individuals in preparation for an academic career by providing services such as counseling; and (4) Provide health services to rural or medically underserved populations. *This program is not included in the President's budget for 2008. Potential applicants for funds should consider this announcement provisional until final Congressional action is taken. Updated information will be available on the HRSA website.

Leadership Education in Maternal and Child Health Nutrition
Modification 1

| | |
|--|--|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | HRSA-08-014 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Dec 21, 2007 |
| Expected Number of Awards: | 6 |
| Estimated Total Program Funding: | \$1,150,000 |
| CFDA Number: | 93.110 -- Maternal and Child Health Federal Consolidated Programs |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others - Only public and private not for profit academic institutions of higher learning may apply.

Description

This program provides graduate training for nutritionists to assume leadership roles in improving the nutritional status of women, infants, children, adolescent and families. The training will prepare program participants to become leaders in public health programs, clinical settings and/or academic settings.

Training Program for Pediatric Communication Disorders
Modification 3

| | |
|--|---|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | HRSA-08-038 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Dec 14, 2007 |
| Expected Number of Awards: | 3 |
| Estimated Total Program Funding: | \$408,000 |
| CFDA Number: | 93.110 -- Maternal and Child Health Federal Consolidated Programs |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others - Only public and not for profit academic institutions of higher learning may apply.

Description

The purpose of this training is to focus on leadership in communication disorders education through graduate training of speech/language pathologists and audiologists for maternal and child health leadership roles in education, service, research, administration, and advocacy in programs providing health and related services for populations of infants, children, particularly those with special health care needs.

Competing Renewal Awards of SBIR Phase II Grants for Pharmacologic Agents and
Drugs for Mental Disorders (SBIR R43/R44) Modification 1

| | |
|--|---|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | PA-06-079 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Jan 07, 2009 Multiple dates, see announcement |
| CFDA Number: | 93.242 -- Mental Health Research Grants |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others (see text field entitled "Additional Information on Eligibility" for clarification)
Small businesses

Additional Information on Eligibility:

Only U.S. small business concerns (SBCs) are eligible to submit SBIR applications. A small business concern is one that, at the time of award for Phase I and Phase II awards, meets all of the following criteria: 1. Is independently owned and operated, is not dominant in the field of operation in which it is proposing, has a place of business in the United States and operates primarily within the United States or makes a significant contribution to the US economy, and is organized for profit. 2. Is (a) at least 51% owned and controlled by one or more individuals who are citizens of, or permanent resident aliens in, the United States, or (b) for SBIR only, it must be a for-profit business concern that is at least 51% owned and controlled by another for-profit business concern that is at least 51% owned and controlled by one or more individuals who are citizens of, or permanent resident aliens in, the United States. 3. Has, including its affiliates, an average number of employees for the preceding 12 months not exceeding 500, and meets the other regulatory requirements found in 13 C.F.R. Part 121. Business concerns are generally considered to be affiliates of one another when either directly or indirectly, (a) one concern controls or has the power to control the other; or (b) a third-party/parties controls or has the power to control both. Control can be exercised through common ownership, common management, and contractual relationships. The term "affiliates" is defined in greater detail in Title 13 Code of Federal Regulations (CFR) Part 121.103. The term "number of employees" is defined in 13 CFR 121.106. A business concern may be in the form of an individual proprietorship, partnership, limited liability company, corporation, joint venture, association, trust, or cooperative. Further information may be obtained at <http://sba.gov/size>, or by contacting the Small Business

Administration's (SBA) Government Contracting Area Office or Office of Size Standards.

Description

This FOA solicits Small Business Innovation Research (SBIR) grant applications that propose to continue the process of developing pharmacologic agents for brain research related to mental disorders, including research aimed at discovering new drugs for these disorders. This FOA specifically invites applications for the competing renewal of previously funded Phase II SBIR grants, to take existing, promising compounds through the next step of drug discovery and development.

Description

The goals of NIH-supported research training and career development programs are to help ensure that diverse pools of highly trained scientists are available in adequate numbers and in appropriate research areas to address the Nation's biomedical, behavioral, and clinical research needs. NIH mentored career development awards provide mentored research experiences to gain additional expertise in a new research area or in an area that will significantly enhance an investigator's research capabilities. It is expected that the mentored research and career development experience will lead to an independent and productive research career.

Description

The National Institute of Neurological Disorders and Stroke and the National Institute of Arthritis and Musculoskeletal and Skin Diseases solicit applications for translational research projects in muscular dystrophy. Several emerging pathways to treatment of muscular dystrophy show promise, ranging from palliative therapies that can markedly delay onset or progression of the disease to genetic or stem cell approaches that may reverse or eliminate the condition. The objective of this initiative is to encourage the pursuit of a broad range of translational research strategies for therapeutic development in muscular dystrophy.

Description

The purpose of this Funding Opportunity Announcement (FOA) is to encourage submission of investigator-initiated research applications on the role of nutrition and diet in the causation, prevention, and treatment of cardiomyopathies and heart failure. Basic, translational, and applied interdisciplinary research applications with rigorous hypothesis-testing designs for projects in animals or

humans are of interest. The overall goal is to develop a satisfactory science base for preventive approaches in high-risk individuals and for rational nutritional management of patients in various stages of heart failure.

Description

Under this Funding Opportunity Announcement (FOA), the National Institute of Neurological Disorders and Stroke (NINDS), the National Institute on Aging (NIA), and the National Institute of Nursing Research (NINR) invite research grant applications that address the underlying neurobiological mechanisms associated with the cognitive impairment in Parkinson's disease (PD), that address the development of clinical interventions and therapeutics for cognitive impairment in PD, or that promote improved clinical diagnosis or treatment of cognitive impairment in PD. A goal of this PA is to begin a process where basic and clinical scientists from various disciplines can overcome barriers to cross-disciplinary and biobehavioral research and examine all aspects of cognition in the context of the diagnosis and treatment of Parkinson's disease.

Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education

Private institutions of higher education

Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education

Description

The goals of NIH-supported career development programs are to help ensure that diverse pools of highly trained scientists are available in adequate numbers and in appropriate research areas to address the Nation's biomedical, behavioral, and clinical research needs. - The purpose of the Mentored Research Scientist Development Award (K01) is to provide support and protected time (three, four, or five years) for an intensive, supervised career development experience in the biomedical, behavioral, or clinical sciences leading to research independence.

Awards are not renewable, nor are they transferable from one principal investigator to another. - The K01 application may be submitted on behalf of the candidate (principal investigator) by any domestic for-profit or non-profit institution/organization, or public or private institutions, such as universities, colleges, hospitals and laboratories. Foreign institutions are not eligible to apply.

- Candidates must be U.S. citizens or non-citizen nationals, or an individual lawfully admitted for permanent residence, who hold a research or health-professional doctoral degree or its equivalent and can commit a minimum of 75% of full-time professional effort conducting research and relevant career development activities specified in the application. Receipt of prior support may impact on eligibility. - The candidate must demonstrate and justify the need for a three, four, or five-year period of additional supervised research experience.

Planning, direction, and execution of the proposed career development program and research project will be the responsibility of the candidate and his/her mentor. - The proposed career development experience must be in a research area new to the applicant and/or one in which an additional supervised research experience will substantially augment the research capabilities of the applicant. -

The candidate should provide a plan and proposed timeline for achieving independent research support by the end of the award period. - The amount funded as salary for a career development award is not uniform throughout the NIH participating Institutes and Centers (ICs); therefore, the applicant is strongly advised to contact the relevant IC for any distinct guidelines, requirements, and allowable funds (see website referenced in Section VII for IC contacts). - The total amount to be awarded and the number of anticipated awards will depend upon the quality, duration, and costs of the applications received as determined by the peer review process, available funds and program priorities. - The

candidate for this K01 award may not concurrently apply for or have an award pending for another NIH career development award. Up to two revisions of an application will be accepted. - Applications must be submitted on or before the receipt dates described at

<http://grants.nih.gov/grants/funding/submissionschedule.htm>. - Special Note: The participating NIH ICs may have distinctive guidelines, requirements, and funding amounts for this announcement in order to accommodate the career development needs of researchers working in fields related to their specific research missions. Candidates are therefore strongly encouraged to contact the staff person in the relevant Institute or Center listed under Section VII prior to preparing an application to discuss issues of eligibility, program relevance, and review the specific provisions of this award. - See Section IV for application and submission information. - Telecommunications for the hearing impaired is available at: TTY 301-451-0088

Description

The National Institute on Aging (NIA) invites applications for research on retirement economics. The research objectives of this funding opportunity announcement (FOA) include, but are not limited to: (1) the determinants of retirement behavior, (2) the variation in work patterns in later life, (3) the evolution of health and economic circumstances of individuals through retirement and into later life, (4) time use and life satisfaction before and during retirement, (5) the implications of retirement trends, (6) retirement expectations, (7) international comparisons of retirement and (8) the development of innovative retirement modeling techniques.

Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Others (see text field entitled "Additional Information on Eligibility" for clarification)

Description

The objective of this funding opportunity announcement (FOA) is to solicit grant applications for basic research projects to investigate how changes in the extracellular matrix with age affect the function of the tissues of the musculoskeletal system and skin. Projects are encouraged that determine how cellular aging processes lead to altered matrix production and maintenance, and how aging-related altered matrix composition and organization affect the function of these tissues. This funding opportunity utilizes the NIH R21 Exploratory/Developmental Research Grant award mechanism and runs in parallel with a program announcement of identical scientific scope that utilizes the traditional research project grant (R01) mechanism (PA-03-167). The number of awards made under this solicitation will depend on the overall scientific merit of the applications and the availability of funds. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received.

Description

The goal of this program announcement is to provide support for the development of a comprehensive research protocol for large-scale, multicenter clinical trials. This planning grant provides early peer review of the proposed clinical trial in terms of its rationale, general design, organizational structure and implementation plan. The planning grant is used to support the development of a detailed Manual of Procedures (MOP) and can include preliminary studies to refine study procedures or to document recruitment potential of clinical sites.

 Public housing authorities/Indian housing authorities
 Private institutions of higher education
 Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education

Description

The goal of this initiative is to encourage exploratory/developmental clinical studies that will accelerate the development of effective interventions for prevention or treatment of overweight or obesity in either adults or children. Exploratory epidemiological research with a goal of informing translational/clinical research will also be supported within this program. This FOA will use the NIH Exploratory/Developmental Research Grant (R21). Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the quality, duration, and costs of the applications received.

Description

The objective of this FOA is to encourage grant applications for exploratory (R21) grants from individuals who are interested in testing new ideas that may advance progress in cancer detection, diagnosis, and prognosis. -Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications; therefore, the anticipated number of awards is not known.-This FOA utilizes the Exploratory/Developmental grant (R21) mechanism.-Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received.-The total project period for an application submitted in response to this funding opportunity may not exceed 2 years. Direct costs are limited to \$275,000 over an R21 2-year period, with no more than \$200,000 in direct costs allowed in any single year.-Eligible organizations: For profit organizations; non-profit organizations; public or private institutions, such as universities, colleges, hospitals and laboratories; units of State governments; units of State Tribal governments; units of local governments; units of local Tribal governments; eligible institutions of the Federal government; domestic institutions; foreign institutions; and faith-based or community-based organizations.-Eligible Project Directors/Principal Investigators (PDs/PIs) include any individuals from the applicant institutions who have the skills, knowledge, and resources necessary to carry out the proposed research. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support.-Applicants may submit more than one application, provided each application is scientifically distinct.

Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Independent school districts
Faith-based or community-based organizations can apply.

Description

This Funding Opportunity Announcement (FOA) is designed to foster innovative collaborative research to characterize the structural properties of taste and smell receptors. Additional emphasis is placed on the characterization of the interactions among odors, pheromones, and taste substances with their cognate receptors, and the identity of the critical ligand-receptor binding sites that determine sensitivity and selectivity. One aim of this FOA is to encourage collaborations among chemosensory molecular biologists and biochemists with expertise in the isolation and characterization of membrane proteins, and biophysicists familiar with crystallography, NMR and other analytical tools used in structural analyses. This FOA will use the NIH investigator-initiated exploratory/developmental (R21) grant mechanism. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received. Budget and Project Period. The total project period for an application submitted in response to this FOA may not exceed two years. Direct costs are limited to \$275,000 over an R21 two-year period, with no more than \$200,000 in direct costs allowed in any single year. Eligible Organizations: For-profit organizations; non-profit organizations; public or private institutions, such as universities, colleges, hospitals, and laboratories; units of State governments; units of local governments; eligible agencies of the Federal government; domestic institutions; foreign institutions; faith-based or community-based organizations; Indian/Native American Tribal Government (Federally Recognized); Indian/Native American

Tribal Government (Other than Federally Recognized); and Indian/Native American Tribally Designated Organization. Eligible Project Directors/Principal Investigators (PDs/PIs): Any individual with the skills, knowledge, and resources necessary to carry out the proposed research is invited to work with their institution to develop an application for support. Individuals from underrepresented racial and ethnic groups as well as individuals with disabilities are always encouraged to apply for NIH support. Applicants may submit more than one application, provided they are scientifically distinct.

Additional Information on Eligibility:

Foreign institutions are not eligible to apply. Eligible agencies of the Federal Government can apply. Faith-based or community-based organizations can apply. Applicants may submit more than one application, provided each application is scientifically distinct.

Description

This Funding Opportunity Announcement (FOA) issued by the National Institute on Alcohol Abuse and Alcoholism (NIAAA), National Institutes of Health, solicits Small Research Grant (R03) applications from institutions/ organizations that propose to investigate the effectiveness of structural interventions that reduce the risk of HIV/AIDS transmission by changing the environment of alcohol use. Although a variety of structural and environmental interventions have been employed successfully to reduce other drinking-related problems, there has been little research that extends such efforts into the realm of HIV/AIDS risk reduction.

Description

-Purpose. This Funding Opportunity Announcement (FOA) solicits Research Project Grant (R01) grant mechanism from institutions/organizations that propose to study the evolutionary principles that underlie the emergence, spread, and containment of infectious disease. An explicit goal of the FOA is to stimulate interdisciplinary research between (a) quantitative and computational sciences and (b) experimental, clinical, or field studies. Areas of particular interest include the evolution of pathogens, evolutionary dynamics of host-pathogen systems, and the consequences of intervention strategies. The focus of this program is limited to discovery of fundamental biological principles rather than to detailed knowledge or treatment of specific diseases. -Mechanism of Support. This FOA will utilize the R01 grant mechanism. -Funds Available and Anticipated Number of Awards. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received.

Department of Health and Human Services
National Institutes of Health
Pilot and Feasibility Studies on Oral Health Promotion Research across the Life Span (R21) Modification 1

| | |
|--|--|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | PA-07-223 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | May 07, 2010 Multiple Receipt Dates - See Link to Full Announcement for details. |
| Award Ceiling: | \$200,000 |
| CFDA Number: | 93.121 -- Oral Diseases and Disorders Research |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

City or township governments
Small businesses
Native American tribal governments (Federally recognized)
Native American tribal organizations (other than Federally recognized tribal governments)
Public housing authorities/Indian housing authorities
Others (see text field entitled "Additional Information on Eligibility" for clarification)
For profit organizations other than small businesses
State governments
Private institutions of higher education
County governments
Special district governments
Nonprofits that do not have a 501(c)(3) status with the IRS, other than institutions of higher education
Public and State controlled institutions of higher education
Nonprofits having a 501(c)(3) status with the IRS, other than institutions of higher education
Independent school districts
Faith-based or community-based organizations can apply.

Description

This funding opportunity announcement (FOA) is intended to encourage preliminary data collection, pilot or feasibility studies on oral health promotion research directed at improving oral health across the lifespan. The study team must include health promotion, behavioral and/or social scientists. This research on prevention of oral diseases and/or their sequelae could focus in any of the following areas: 1) maternal and child health, 2) adolescent and young adult health and 3) the health of adults with complex diseases in the general population or in subgroups of the population with health disparities. The collection of preliminary data, pilot and/or feasibility research would include epidemiological, social, behavioral and environmental assessments for a specific oral disease or condition. These assessments can be done at a state, tribal or local level and will inform a subsequent full scale R01-type study on oral health promotion research. Such health promotion research will be expected to: a) apply or adapt existing behavioral or health promotion theories and planning research models to known risk factors and lifestyle aspects of oral diseases and conditions, b) promote optimal oral health of individuals, families and communities in the context of overall health and co-morbidities, and/or c) integrate oral health promotion into general health promotion programs.

Description

Purpose. This funding opportunity announcement (FOA) is intended to encourage and support meritorious oral health promotion research directed at improving oral health and preventing diseases and/or their sequelae across the lifespan. The research would focus in any of the following areas: 1) maternal and child health, 2) adolescent and young adult and 3) the health of adults and complex diseases in the general population or in subgroups of the population with health disparities. The objective of this FOA is support the formation of

partnerships and/or coalitions among stakeholders to develop a comprehensive research plan on health promotion for a specific oral disease or condition. The partnership or coalition should include individuals with extensive experience in health promotion, behavioral and/or social sciences. This plan would be based on previously collected epidemiological, behavioral, social and/or environmental data and the proposed research plan will inform a subsequent full scale R01-type study. The health research plan could address any of the following areas: a) apply or adapt existing behavioral or health promotion theories and planning research models to known risk factors and lifestyle aspects of oral diseases and conditions, b) promote optimal oral health of individuals, families and communities in the context of overall health and co-morbidities, and c) integrate oral health promotion into general health promotion programs.

Description

Purpose. This funding opportunity announcement (FOA) is intended to encourage the development, implementation and testing of oral health promotion interventions directed at improving oral health across the lifespan. The research team must include someone with extensive experience in health promotion, behavioral and /or social science research. The health promotion intervention must be based on a previously conducted assessment of the epidemiology, social, behavioral and /or environmental factors related to the disease or condition under study. The assessment could have been funded by NIDCR or other sources. This research on prevention of oral diseases or reduction of health disparities could focus in any of the following areas: 1) maternal and child health, 2) adolescent and young adult health and 3) the health of adults with complex diseases. The studies in response to this announcement would: a) apply or adapt existing behavioral or health promotion theories and planning research models to known risk factors and lifestyle aspects of oral diseases and conditions, b) promote optimal oral health of individuals, families and communities in the context of overall health and co-morbidities, and/or c) integrate oral health promotion into general health promotion programs. For clinical trials see <http://www.nidcr.nih.gov/ClinicalTrials>.

Description

This initiative will support a consortium of investigators to conduct a prospective multi-center observational cohort study investigating clinical factors which may be predictive and/or are associated with the failure of newly placed arteriovenous fistulas (AVF) to mature in patients with end-stage renal disease (ESRD). -In FY 2008, the NIDDK anticipates awarding a total of \$3.0 million to establish this new research program. -Six to eight awards to Participating Clinical Centers and one award to a Data Coordinating Center are anticipated.

Computational Tools for Research in Neuroscience, Behavioral Science and Mental Health: STTR [R41/R42] Modification 1

| | |
|--|--|
| Document Type: | Modification to Previous Grants Notice |
| Funding Opportunity Number: | PA-07-423 |
| Opportunity Category: | Discretionary |
| Current Closing Date for Applications: | Jan 07, 2011 Multiple Receipt Dates - See Link to Full Announcement for details. |
| CFDA Number: | 93.242 -- Mental Health Research Grants |
| Cost Sharing or Matching Requirement: | No |

Eligible Applicants

Others

Small businesses

Description

Purpose. This Funding Opportunity Announcement (FOA) solicits Small Business Technology Transfer (STTR) grant applications from small business concerns (SBCs) that propose to develop and validate novel, commercializable, computational tools and resources that will aid neuroscientists, behavioral scientists, mental health researchers, or mental health providers in their research or practice. In addition, this FOA solicits from small businesses grant applications that propose to develop and validate digital approaches that use interactive learning methods to disseminate educational information relevant to mental health, including the areas of behavioral health interventions or assessment tools. **-Mechanism of Support.** This FOA will utilize the STTR (R41/R42) grant mechanisms for Phase I, Phase II, and Fast-Track applications and runs in parallel with a FOA of identical scientific scope, PA-07-424, that solicits applications under the Small Business Innovation Research (SBIR) (R43/R44) grant mechanisms. **-Funds Available and Anticipated Number of Awards.** Budgets up to \$250,000 total costs per year and time periods up to 2 years for Phase I may be requested. Budgets up to \$450,000 total costs per year and up to 3 years may be requested for Phase II. Awards issued under this FOA are contingent upon the availability of funds and the submission of a sufficient number of meritorious applications.

Faith-based or community-based organizations can apply

Description

Purpose: The purpose of this Funding Opportunity Announcement is to solicit applications from qualified investigators for the establishment of a Hepatitis B Clinical Research Network. This network will consist of up to 10 clinical center sites and a single data coordinating center. Additionally, the network will be complemented with two basic/translational research laboratories. A virology center and an immunology center will both be integral to the consortium by

providing support for the scientific pursuits of the network. The total amount to be awarded and the anticipated number of awards. The NIDDK intends to commit approximately \$3,000,000 during FY 2008 (year 1 of the Network) and up to approximately \$7,000,000 per year in years 2 to 7 of the Network. It is anticipated that the number of awards issued under this FOA will be: Up to 10 clinical center (CC) site awards, one data coordinating center (DCC), one virology center, and one immunology center. The number of awards issued under this FOA is contingent upon the availability of funds and the submission of a sufficient number of meritorious applications. Because the nature and scope of the proposed research will vary from application to application, it is anticipated that the size and duration of each award will also vary. The total amount awarded and the number of awards will depend upon the mechanism numbers, quality, duration, and costs of the applications received.
